

How to Break into the **TOP FIVE** of the Leading World Economies?

FIFTH FINANCIAL UNIVERSITY

ECONOMIC FORUM

Moscow, 2018

#IFUForum

In March, 2018 Vladimir Putin declared joining the Top Five of the world's leading economies a national priority. However, this goal cannot be reached without in-depth knowledge and capable use of international best practices. The question of how to reach and maintain an accelerated growth trajectory has been on the minds of Russian policy-makers and leading economist for a long time. We are in constant search of new breakthrough ideas. Dialogue with our international partners is of paramount importance, as Russia's economic growth is closely related to trade and commercial cooperation with other states. In order to achieve the objective set by the President, we need to stabilize political relations with the international community and reinforce political and economic ties with our friends and partners all over the world. These are some of the issues that we plan to confront and, possibly, resolve at the Forum.

The Financial University International Forum – in 2018 held for the fifth time – has become a significant event in the economic and social life of our country. The Forum attracts leading experts, well-reputed academics, representatives of government institutions, and business community.
